Installation:
- Copy and paste folder "app" into the root directory of site source
- Clear the cache and refresh the page
- If the "Testimonials" appears in the Top Links Menu, it works

Usage:
1/ Setup Layout for Frontend:
- Admin -> System -> Configuration -> Nover -> Testimonials -> General
- At line "Layout", set the layout for the Testimonials Page on Storefront

2/ Add Testimonials:
- Admin -> Nover -> Testimonials -> Info
- "Add New"

3/ Add Feedback:
- Admin -> Nover -> Testimonials -> Feedback
- "Add New"
*Note:
1/ We need to create testimonial before adding the feedback.
2/ Cause some cases are able to affect to the performance if the site gets a huge of customers data, the input of user email field is text type instead of select type as testimonial field
